

```
interface MyLambda
{
    void print(String str);
}

public class LambdaExp9 {

    public void reverse(String str)
    {
        StringBuffer sb = new StringBuffer(str);
        sb.reverse();
        System.out.println(sb);
    }

    public static void main(String[] args) {

        // Since The methods is not static, so we wll object
        // This time reference of object.
        LambdaExp9 OBJECT = new LambdaExp9();
        MyLambda ml = OBJECT::reverse;
        ml.print("OHSO");
    }
}
```
